

Artificial Intelligence Engineering Guide

AI Engineers build intelligent systems that solve real problems.

The most important skills for AI engineers are:

1. Python programming
2. Building LLM applications
3. Working with APIs
4. Deploying applications

The average salary for an AI engineer is between \$100,000 and \$200,000 per year.

Top companies hiring AI engineers include Google, Microsoft, and OpenAI.

Pakistan has a growing demand for AI engineers especially in Karachi and Lahore.
